EGYSPY

Stakeholder Register

Task T3 — Stakeholder Analysis

Project	EgySpy	**Task Owner**	Omar Moharam
Phase	Requirements Gathering	**Task Priority**	Medium
Dependency	Task 1 — Project Proposal Consolidation	**Planned Dates**	05–08 October 2026
Document Status	Draft for team review	**Approval Status**	Not approved

1. Purpose and Scope

This document identifies the stakeholder groups currently included in the EgySpy project, summarizes their needs and expectations, and provides a preliminary influence–interest assessment. It is based on the consolidated project proposal, Task T3 in the Task Assignment Plan, and the team's confirmed clarification of the Supervisor role. This is a working draft for team review and has not received final approval.

EgySpy is intended to provide management with visibility into employee movement within a defined facility during working hours, including locations visited and time spent at locations. The project does not determine whether an employee is actually performing assigned work, and it is not defined as a general attendance-management system. Tracking technology, architecture, and detailed access-control policies remain unspecified in the proposal.

2. Stakeholder Register

	Stakeholder / Group	Relationship to System	Needs and Expectations	Influence	Interest	Classification
1	Management	Primary system user	View employee movement within the defined facility during working hours; review locations visited and time spent at locations; identify movement that may require attention; support monitoring and accountability.	High (preliminary)	High (preliminary)	Included in curre scope
2	Employees	People whose movement is monitored; not system users under the current decision	Movement is tracked within the defined facility and working hours as described in the project scope. Notification, access to personal movement records, correction or objection processes, retention, and privacy handling have not yet been specified and require further requirements work.	Medium (provisional)	High (provisional)	Included in curre scope
3	EgySpy Admin	Internal system administrator	The Admin is responsible for managing factory accounts on the EgySpy platform and coordinating with the System Administrator to resolve system-related issues.	High (provisional)	High (provisional)	Included in curre scope
4	System Administrator	System administration/support role; Operational system user responsible for employee-status management and coordination with EgySpy support.	Add, update, and delete employee records or change employee status within the system, according to granted permissions; serve as the organization's contact with EgySpy customer support; handle system issues or escalate them when needed; receive training from EgySpy to use and operate the system. Exact deletion behavior, status values, and technical permissions remain to be defined.	High (provisional)	High (provisional)	Included in curre scope

3. Preliminary Influence–Interest Matrix

Ratings below are preliminary assessments for discussion. They should be validated by the team before the register is approved.

Influence / Interest Area	Stakeholders	Suggested Engagement
High influence / High interest	Management (preliminary); System Administrator (provisional); EgySpy Admin	Engage closely to validate monitoring objectives, administration responsibilities, employee-status management, and support/escalation procedures.
Medium influence / High interest	Employees (provisional assessment)	Consider the impact of monitoring and define transparency, data-access, and data-handling

		requirements.

4. Confirmed Decisions and Open Questions

4.1 Current scope decisions

- Management is an intended system user.
- Employees are monitored by the system but are not intended to use it under the current decision.
- The System Administrator is included as an operational stakeholder. The Supervisor can add, update, and delete employee records or change employee status within the system; communicate with EgySpy customer support; handle system issues or escalate them when necessary; and must receive training from EgySpy. Exact deletion behavior, employee-status values, and technical issue-resolution permissions still require clarification.
- EgySpy Admin :Manage factory accounts on the EgySpy platform ,Coordinate with the System Administrator to investigate and resolve system-related issues ,Ensure factory accounts are managed properly and account-related issues are addressed.

- The system scope covers employee movement within a defined facility during working hours, including visited locations and time spent at locations.

4.2 Requirements to clarify

- The System Administrator's exact responsibilities, permissions, and boundaries.
- Employee-facing transparency and privacy requirements, including notice, access to records, correction or objection handling, and data retention.
- The exact meaning of deleting an employee, the available employee-status values, and the Supervisor's technical permissions and escalation process for resolving system issues.
- Final influence and interest ratings for all four included stakeholder groups.

5. Alignment with Task T3 Acceptance Criteria

Acceptance Criterion	Current Evidence / Status
Stakeholder groups identified	Current project scope lists Management, Employees, System Administrator, and Supervisor.
Needs and expectations described	Drafted for all four included groups; administrator duties, Supervisor permissions, and employee data-handling needs remain open for clarification.
Influence–interest matrix prepared	Prepared provisionally for the four included stakeholder groups.
Team approval	Pending — this document is not approved.

6. Source Documents

1. EgySpy — Consolidated Project Proposal, Baseline v1.

2. EgySpy — Project Team Task Assignment & Responsibility Plan, Task 3: Stakeholder Analysis (page 9).

Document control note: This draft reflects the current decision to include Management, Employees, System Administrator, and Supervisor only. It is not final approval of Task T3. Do not mark the task as completed until stakeholder coverage and the influence–interest matrix have been reviewed and approved by the team.
