

EGYSPY

Stakeholder Register

Stakeholder Analysis

Project	EgySpy	Task Owner	Omar Moharam
Phase	Requirements Gathering	Task Priority	Medium

1. Purpose and Scope

This document identifies stakeholder groups relevant to EgySpy, summarizes their needs and expectations, and provides a preliminary influence–interest assessment. It is based on the consolidated project proposal and Task T3 in the Task Assignment Plan. The register is a working draft for team validation; it does not constitute final stakeholder approval.

EgySpy is intended to provide management with visibility into employee movement within a defined facility during working hours, including locations visited and time spent at locations. The proposal does not define the tracking technology, system architecture, or detailed access-control policy.

2. Stakeholder Register

ID	Stakeholder / Group	Relationship to System	Needs and Expectations	Interest	Classification
ST-01	Management	Primary system user	View employee movement within the defined facility during working hours; review locations visited and time spent at locations; identify movement that may require attention; support monitoring and accountability.	High (preliminary)	Confirmed
ST-02	Employees	People whose movement is monitored; not system users under the current project decision	Movement is tracked only within the defined facility and working hours as described in the project scope. Notification, access to personal movement records, correction/objection processes, retention, and detailed privacy arrangements are not defined and require further requirements work.	High (provisional)	Affected group confirmed; details open
ST-03	System Administrator	Potential operational/support role; responsibilities not specified	Potential needs could include account or system configuration management, but these functions are not established in the proposal and must not be treated as approved requirements.	TBD	Requires team confirmation
ST-04	Work-area Supervisor	Potential stakeholder for area-level monitoring; role not specified	Potential need to view movement within an assigned work area, if supervisors are intended to use the	TBD	Requires team confirmation

Draft for team review — not approved

ID	Stakeholder / Group	Relationship to System	Needs and Expectations	Interest	Classification
			system.		
ST-05	Human Resources (HR)	Potential stakeholder; involvement not specified	Potential use of movement information for administrative follow-up must be confirmed. EgySpy is not defined as a general attendance-management system.	TBD	Requires team confirmation

3. Preliminary Influence–Interest Matrix

Ratings below are preliminary judgments based on the proposal and current scoping decision. They are not measured values and should be reviewed by the team.

Influence / Interest Area	Stakeholders	Suggested Engagement
High influence / High interest	Management (preliminary)	Engage closely; validate monitoring goals, reporting needs, and decision criteria.
Medium influence / High interest	Employees (provisional assessment)	Consider the impact of monitoring and clarify transparency, data access, and handling rules during requirements work.
Influence and interest not yet assessed	System Administrator; Work-area Supervisor; HR	Confirm whether each group exists in the intended operating model before assigning ratings or access.

4. Confirmed Decisions and Open Questions

4.1 Confirmed for this draft

- Management is the intended system user.
- Employees are monitored by the system but are not intended to use the system under the current decision.
- The project scope covers employee movement within a defined facility during working hours, including visited locations and time spent.
- The project does not determine whether an employee is actually performing assigned work and is not a general attendance-management system.

4.2 Items requiring team confirmation

- Whether a separate System Administrator role is required and what permissions it would have.
- Whether Work-area Supervisors will access the system, and if so, which areas and records they may view.
- Whether HR will use movement information for any defined process.
- Employee-facing transparency and privacy requirements, including notice, access to records, correction or objection handling, and data retention.
- Final influence and interest ratings for all stakeholders.
